

Safehost Quality and Information Security Policy

Quality and Information Security are an integral part of Safe Host's mission to become the leading Data Centre Infrastructure Provider. This mission can be achieved by offering our Customers Quality Service Level Agreements backed by the highest standards of engineering and operational excellence. Our services can therefore provide our customers improved performance, reduced risks and lower costs.

Our Quality and Information Security Policy summarises the main elements of our commitment for excellence and includes:

- Integrating a system of procedures that reflect the competence of the Company to its existing customers, potential customers, and independent auditing authorities,
- Involving all staff, who are individually responsible for the quality of their work, in order to continually improve their work environment for all. This policy is provided and explained to each employee by the Chief Executive Officer or Quality Manager,
- Encouraging participation and promotion of quality responsibilities amongst staff and third parties through standards, education, training, management and clear communication,
- Complying with relevant laws and regulations as well as internal requirements,
- Achieving and maintaining the required level of assurance with the Chief Executive Officer retaining full responsibility for the Quality and Information Security System with routine operation controlled by the Quality Manager,
- Regularly reviewing for continuing suitability

Quality and Information security are the responsibility of everyone, in every activity, throughout Safe Host.
